Roadworks and Bulk Earthworks

Tarmac & Bitumen Surfacing has significant experience in the construction of all types of civil roadworks in South Africa. We are a professional Roadworks construction company, providing high quality Roadworks to both homeowners, building contractors and businesses in South Africa. This includes car parks and kerbing, as well as the construction of other hardscaped surfaces, such as brick paved areas and footpaths.

At Tarmac & Bitumen Surfacing we appreciate that whilst underground services are essential for the provision of power, water and other services, above ground finishes are no less important, as it is these elements that prospective purchasers judge a development on.

The team at Tarmac & Bitumen appreciate take great pride in delivering the highest standards of construction to finish our roads, car parks and hardscaped surfaces. We completely appreciate and understand that the final aesthetic quality of our projects is vitally important to our clients.

Bulk earthworks include the removal, moving or adding of large quantities of soil or rock from a particular area to another. We do this in order to make an area a suitable height and level for a specific construction purpose. Bulk earthworks are needed in order for a wide range of construction projects to be done. This can include the building of:

- A weed-free surface
 - A well levelled ground and excellent drainage plan
 - Strong base
 - Good edging
 - Good layer thickness
 - Good compaction
-
- Roads
 - Berms
 - Highways
 - Trenches
 - Residential and commercial buildings

Residential and Commercial Building Construction

Tarmac & Bitumen Surfacing was established to fulfill special needs for home owners and other commercial clients. The founding members have vast experience and passion for construction. We in-cooperate the latest building technology and modern design enhancements which are friendly with the environment.
